

SAVE OUR SEPPO –AN INFO - COMEDY ABOUT WATER AND WASTE

Robert Harris
Byron Shire Council

Our video presentation provides essential information for householders who own and operate septic tank systems. The information is presented in a humorous and engaging style and addresses a variety of important ownership issues including;

- ~ septic system operation
- ~ septic system components
- ~ basic maintenance
- ~ trouble-shooting

Without the understanding and support of system owners Governments and Councils cannot implement long-term practical improvements in management of on-site sewage management systems.

Previous surveys by Byron Shire Council have indicated that many owners do not have a good understanding of on-site systems and Septic Õ Safe management practices. In fact over 90% of owners surveyed could not indicate the basic operation and maintenance requirements for their system.

This video production will be useful in developing environmental education programs that will appeal to a wide variety of audiences, including children and new residents who have not previously been responsible for the operation of an on-site system.

Small rural Councils that lack resources to undertake educational programs for Septic Õ Safe promotions will benefit from this ready-made educational program.

The video provides operators with a basic understanding of the limitations of the system and the need for an operation and maintenance manual.

Filming and production of the video has been carried out in the Byron area with the support and involvement of local community groups and individuals. The local community has supported this production in providing time and assistance in production.

The video provides a Septic Õ Safe resource material for local Councils across NSW and Australia. One copy of the video will be freely distributed to local Councils throughout NSW. Production and editing has been completed in Byron Bay at “Filmstream”, a local production company with a growing reputation in the environmental education field.

SAVE OUR SEPO AN INFO - COMEDY ABOUT WATER AND WASTE

Our video presentation provides essential information for householders who own and operate septic tank systems. The information is presented in a humorous and engaging style and addresses a variety of important ownership issues including:

- ~ septic system operation ~ basic maintenance*
- ~ septic system components ~ trouble-shooting*
